Skills Development Framework

Part 8

Background purpose

To promote skill development.

Help swimmers and parents understand the need for greater efficiency of technique as a primary consideration

To assist the swimming community in understanding land conditioning and how it directly impacts upon performance

Key Goals

Develop body awareness during land work that can translate to the pool environment, leading to a smoother progression route for swimmers

Create consistency of standards across Wales during the development pathway

Allow other coaches to share their thoughts on stroke development and focus swimmers to train on drills that will directly impact on their performance

Part 8
